

IFS Part #91905

Exhaust Kit, 45° Elbow, Cascadia

The 45° Exhaust Kit is used on trucks with horizontal exhaust systems (belly exhaust). The 45° Exhaust Kit is used when the truck's exhaust exits near the Idle Free APU. This Kit uses (2 each) 45's that move the truck's exhaust behind and around the APU. The APU warranty is **VOIDED** if the truck's exhaust is not routed clear of the APU.
